Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claim 1 is rejected under 35 U.S.C. 103(a) as being unpatentable over Polhemus et al (US 3520180) in view of Knestal (US 6457352).

Regarding claim 1 Polhemus et al teaches four rollers 12, and four motors 54, each of which drives a respective one of the rollers 12 (col. 2 lines 35-40); wherein the rollers 12 each. Polhemus does not teach asynchronous motors and an irregular surface/coating rows. Knestel implies the teaching of asynchronous motors (col. 4 lines 65-67). It would have been obvious to a person having ordinary skill in the art of road test simulators at the time the invention was made to modify the device taught by Polhemus with asynchronous motors as taught by Knestel for the purpose of increasing the accuracy of road test measurements. With respect to irregular surface/coating rows, it would have been obvious to one having ordinary skill in the art at the time the invention was made to provide an irregular surface on a tire since it was known in the art that tires are manufactured with an irregular surface.

Allowable Subject Matter

2. Claims 18-22 are allowed.

Claims 2,3 and 5-16 objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter: The claims are deemed to be a direct and unobvious improvement over (US 3520180). The claims comprise the rollers have respective widths greater than twice a tire width of the tires of a vehicle tested by the road test simulator inverteers respectively controlling the asynchronous motors and control units, each of which controls speed and angular synchronism of a respective one of the rollers.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Andre J. Allen whose telephone number is 571-272-2174. The examiner can normally be reached on mon-fri 8:00-4:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Edward Lefkowitz can be reached on 571-272-2180. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
